# ARTIFICIAL INTELLIGENCE TOOLS FOR LANGUAGE AND BILINGUAL TEACHERS (morning shift)

## COURSE
(10 hours, 1 credit)

### Monday 9th and Wednesday 11th March
(10:00 to 13:00 hours)

In-person at the  EOI de Burgos

Aimed at language teachers of any level. They will need to bring their own digital devise

Foto: Diseñada con Copilot

This hands-on workshop shows language and CLIL teachers how generative AI (Artificial intelligence) can act as a co-teacher: helping plan lessons, create ready-to-use materials, and improve existing resources. It begins with the basics of chatbots and language models, their possibilities and limits, and how to use them critically and responsibly in schools. Participants turn prompts into practical outputs such as differentiated tasks, activity variations, rubrics, feedback starters, and quick formative checks. Más información.

## ▶ Program
